

The Binational Migrant Education Program encourages coordination between the U.S. and Mexico in an effort to improve the continuity of educational and social services for migrant students who travel between

both countries. This program is ratified through a [Memorandum of understanding](#) by both parties in an effort to promote continued educational dialogue.

Additionally, The Arizona Migrant Education Program 'Binational Wheel' training, functions as a touchstone comparison of both countries school systems. This comparison may elucidate any questions that may arise when enrolling and placing a student with foreign credentials. For more information please contact: paulino.valerio@azed.gov
